

# WEAVE

## HOW TO CARE FOR YOUR CUSHIONS

In this quick guide, we share three easy ways you can wash your cushion inners and covers to keep them looking great.

### FLUFFING & PLUMPING

Never underestimate how fresh a sofa of plump cushions looks!

Our favourite technique for fluffing and plumping is the karate chop method. Simply hold the cushion over your knee and give it a few karate chops on each side. This will work the inner back into the corners of the cover to give it that plump, fluffy fill.

### HOW DO I WASH MY COVERS?

This depends on the fibre content and style of the cushion cover. Even some fabrics that are the same composition, may have different recommendations for care. Be sure to always check the care label on your product first before doing any cleaning to ensure you are following the right instructions.

### MACHINE WASH

- Gentle cold machine wash
- Wash with like colours
- Lie flat to dry
- Do not tumble dry
- Cool iron on reverse
- Dry-cleanable

### HAND WASH

- Gentle cold hand wash
- Wash with like colours
- Lie flat to dry
- Do not tumble dry
- Cool iron on the reverse
- Dry-cleanable

### DRY CLEAN ONLY

Don't be tempted to take matters into your own hands! Take these cushion covers to your local dry cleaner for a proper assessment and clean.

### SPOT CLEANING

For small spills or marks, it is best to spot clean. Use a soft cloth with a small amount of water and a gentle detergent to blot the stain (without rubbing) – you can then press the stain with a paper towel to remove the loose particles. Be sure to test this first on a small patch of the cushion to make sure your detergent is appropriate for the specific fabric.

## CLEANING YOUR CUSHION INSERTS

Weave cushions come with either a microblend insert or a feather insert. Although they both have a quality Japara cover and look very similar, they have different washing instructions due to their different fillings.

### HOW TO WASH MICROBLEND INSERTS

1. Put your inner in a warm machine wash
2. Line dry in the shade or tumble dry warm thoroughly before re-use or storage

### HOW TO WASH FEATHER INSERTS

1. Warm machine or hand-wash
2. Warm tumble dry thoroughly before re-use or storage
3. Air (fluff and plump well) before use

### HOW TO WASH POLYESTER INSERTS

Before August 2020 polyester inserts were a standard inclusion with all cushion covers. If you own one of these cushion inners, we advise that you follow these steps to clean:

1. Hand-wash only
2. Gentle squeeze
3. Drip dry thoroughly before re-use or storage
